こんな**火災**が発生しています There's a fire like this

Cooking stove fire

CASE
1

Clothes caught fire

An elderly woman was cooking on a gas stove, and her sleeve caught fire when she tried to pick up chopsticks that had fallen into the gap.

She was taken by ambulance with severe burns.

burnt clothes

実際に着火した衣類

Avoid burns this way

Fire does not protrude from around the pot

▶ Elderly people can't see gas flames well

▶ ガスの炎は高齢者に見えにくいことがあります

Tidy up around the gas stove

▶ Do not put a cloth or leave oil stains

▶ ふきんや使用済み油は置かない

Use a gas stove with a safety device

▶ The safety device is called "Si sensor"

▶ 旧型（2008年製以前）のコンロを使用していませんか

If you have extensive burns, call an ambulance immediately.

▶ Danger to life. don't hold back !!

▶ 生命の危険があります。我慢せず、救急車を呼んでください

CASE
2

Forgotten deep-fried food

A hotel employee was making fried food for guests. The employee was so busy that he left the oil pan on the fire, causing the hot oil to catch fire. The hotel burned down.

Damage exceeded \$100,000

?

Question

**Will an IH cooking heater
never catch fire?**

**Even IH cooking heaters
can catch fire**

A

Answer

直接火を使わないため安全な「IH」ですが、正しい使用方法を知らないと加熱のしすぎから火災になることがあります。以下は揚げ物をしていて発火したケースで

**Concrete
example**

Do not use pots that are not suitable for IH.

▶ Safety mechanism may not work

Cook fried foods in fry mode

▶ Prevent overheating

Put enough oil in the pan

▶ If the oil is too low, the safety device may not work

**Never take your eyes off
fried food!**
